

To Whom it May Concern:

I am a current subscriber of VOOM programming and desire to continue receiving their programming. VOOM provides an unprecedented value and more High Definition programming than any other consumer programming service in existence. If Digital TV in general and High Definition TV specifically are to gain the public acceptance necessary to convert our antiquated analog television broadcasting system over to digital, then it is vital that providers of high quality and quantity High Definition and Digital TV programming be supported by agencies like the FCC. I fully support VOOM's commitment & track record of providing HDTV, and VOOM HD LLC's desire to continue operating Rainbow-1 at the 61.5 frequencies. I also reminded the FCC of their past rulings that side on increased competition and consumer choices; this is clearly in the best interest of the public.

Respectfully,  
David A. Bulik
